The most advanced identity protection available

Allstate Digital Footprint

Our unique tool helps users see what accounts they have online and detect if personal information has been exposed.

Comprehensive monitoring and alerts

Our proprietary monitoring platform detects high-risk activity to provide rapid alerts at the first sign of fraud, so participants can detect fraud at its earliest sign, enabling quick restoration for minimal damage and stress.

Dark web monitoring

In-depth monitoring goes beyond just looking out for a participant's Social Security number. Bots and human intelligence scour closed hacker forums for compromised credentials and other personal information. Then we immediately alert participants who have been compromised.

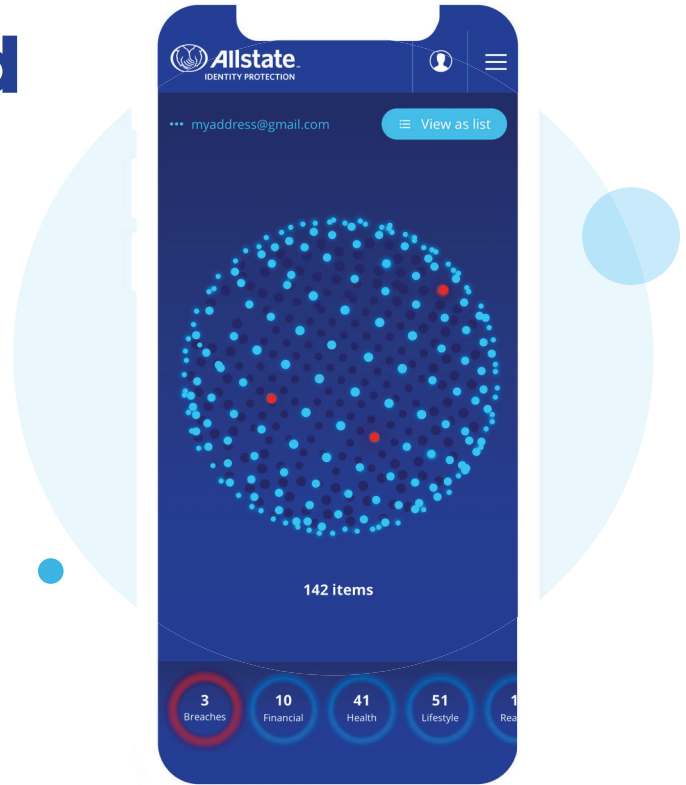

High-risk transaction monitoring

We send alerts for non-credit-based transactions like student loan activity and medical billing.

Account activity

Participants are alerted when unusual activity on their personal banking accounts could be a sign of account takeover.

Financial activity monitoring

Alerts triggered from sources such as bank accounts, thresholds, credit and debit cards, 401(k)s, and other investment accounts help participants take control of their finances.

Social media monitoring

Participants can keep tabs on social accounts for everyone in their family, with monitoring for vulgarity, threats, explicit content, violence, and cyberbullying. We also monitor for account takeovers that could lead to costly reputation damage.

IP address monitoring

We look for malicious use of our users' IP addresses. IP addresses may contribute to a profile of an individual, which — if compromised — can lead to identity theft.
